Status Report

Chemical engineering. I want to make rubber. I really do. The best rubber, it is possible – maybe not. Tylenol? No, rubber it is. Do not touch my rubber, my L^AT_EX, my precious...

Gonzalves, Aditi, Miyazaki. Don't lie to me, no please, really. I need it. I need it more than anyone else, I'll give you the formula:

$$\forall B \in \mathcal{B}(\mathcal{X}^a), \forall t \geq 0, P_\nu(Y_t \in B, T > t) = \nu(B)P_\nu(T > t).$$
